

## ULANO MAGIC MESH PREP

### Preparation and degreasing agent for screen-printing meshes

**ULANO MAGIC MESH PREP** is a highly efficient screen mesh preparation which improves the coating properties of direct emulsions and the water transference of indirect and direct stencil making films. **ULANO MAGIC MESH PREP** also acts as a degreaser making it a universal agent for mesh pre-treatment. By the treatment with **ULANO MAGIC MESH PREP** an even water film forms on the screen-printing mesh when rinsing with water.

#### APPLICATION

Apply **ULANO MAGIC MESH PREP** immediately before making the stencil. Avoid formation of aerosols (do not spray) when applying the product manually. For automatic application, use **ULANO MAGIC MESH PREP** only in closed screen cleaning units.

Apply **ULANO MAGIC MESH PREP** with a brush, sponge or coating trough onto the screen. For cleaning/ degreasing, preferably use a brush. A coating trough or a sponge is sufficient when the screen is not too dusty. Then rinse with cold or lukewarm water with the screen in vertical position until the water runs off without any foaming. A perfect, uniform water film is clearly visible.

Indirect or water transferable stencil making films (capillary films) can easily be transferred onto the mesh now. The screen must be dry before coating with direct photoemulsions or stencil making film, which is applied using transfer emulsions.

**ULANO MAGIC MESH PREP** produces little foam and can therefore be used in automatic cleaning and degreasing units.

---

<b>COLOUR</b>	Milky-white
<b>CONSISTENCY</b>	Liquid
<b>HEALTH HAZARDS/ ENVIRONMENTAL PROTECTION</b>	Please follow further information given in the material safety data sheet.
<b>STORAGE</b>	2 years (at 20° C ± 5°C in tightly closed original container).

---

This data sheet is for your information. A legally binding assurance of the product's suitability for a specific purpose cannot be derived from it and no liability can be assumed for any potential damages that may occur. Our products are subject to continuous production and quality control and leave our company in perfect condition.

This product is intended solely for industrial applications and not for use by the end consumer. We recommend to our customers to always test the product themselves since only in this way – also after production – can the freedom from certain substances and the suitability for a particular purpose be verified. The user has to test the product for suitability for the intended application. We reserve the right to modify product specifications. Tests that are not part of the specifications of the product mentioned above have not been carried out.
